Dick Ritger's Feelings of Bowling™ have been developed over 30 years of working with all skill levels of bowlers. The skill drills will develop and fine tune feelings for the novice bowler and skilled bowler alike. A series of skill drills are used to isolate specific parts of the game. Repetition of these skill drills creates muscle memory. The feelings are then blended together to create an overall solid foundation for the physical game. This clinic will key in on:

- Balance
- Timing
- Leverage
- Free Pendulum Swing
- Release
- And much, much more...
